

Maths Quality Mark

Throughout the year we have been working on achieving the numeracy for life quality mark for excellence in Mathematics.

We have weaved lots of exciting opportunities into our maths curriculum to help the children gain vital lifelong mathematic skills. These include multiplication slams, maths wow weeks, cross curricular mathematics real life problems and curriculum enhancements such as cookery and forest schools.

On Wednesday 10th July, the whole school will be participating in a Maths cultural capital event looking at developing maths for future careers and problem solving strategies for life.
